**DETAILED ACTION**

***Amendment***

1. Receipt is acknowledged of the Amendment filed September 9, 2003.

***Allowable Subject Matter***

2. Claims 1-12 are allowed.
3. The following is an examiner's statement of reasons for allowance: The best prior art of record, taken alone or in combination, fails to specifically teach or fairly suggest the signal sequencing control means for an electronic device as disclosed in independent claims 1, 11, and 12. Such specifics not disclosed in prior art include the sequencing control means and the timing means. The sequencing control means comprises an electronic circuit, which is driven to generate the sequence of control signals in a forward and reverse direction along the same circuit path. The timing means is used to allow a sequence of control signals to be activated in a pre-determined order for in order for the device to operate and deactivated in a reverse order in order to disable the device. Although prior art in general teaches activating and deactivating a smart card device, the prior art taken of record does not teach the specific formation of the signal sequencing control means nor the timing means to accomplish the activation and deactivation of a smart card.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
